

NRCS Program Assistance

EQIP provides financial and technical assistance to agricultural producers to address natural resource concerns and deliver environmental benefits such as improving water and air quality, conserving ground and surface water, reducing soil erosion and sedimentation or improving or creating wildlife habitat. In FY22-23 Farm Bill programs implemented various conservation applications within 2,185 acres. In addition, NRCS approved 3 High Tunnel contracts, 8 drainage surveys and 2 pond borings.. These contracts included cost-share assistance to help landowners improve irrigation water use efficiency, reduce soil erosion, establish and/or improve habitat for wildlife and native pollinators, and improve pasture conditions.

Crawfish Ponds
